

# CELEBRATE!

*Scott Friedman, CSP*  
*Humor / Inspiration / Engagement*

## Audio/AV requirements

We want to work with you to provide the best possible experience for your audience. Below you will find some requirements and guidelines. Please discuss your event with us in detail after reviewing these.

Scott travels with a MacBook Air™ with an adaptor. He incorporates audio and video multimedia effects into his programs via Keynote (Apple/Mac presentation software). To ensure quality, it is necessary for this presentation to play directly off Scott's computer rather than a house computer.

Scott will need the following:

- LCD projector and screen

- 1 Lavalier microphone (This should be separate from the introducer's microphone.)

## Lighting

These high-energy programs are optimal with lighting to match. Please ensure the room and stage are brightly lit and the projector is still able to be seen in bright light.

## Media

Photographs are permitted and encouraged with copies provided to Scott Friedman & Associates.

Audio and video recording permitted with permission from Scott Friedman & Associates.

A master copy must be provided to Scott Friedman & Associates.

Video footage may only be used for in house purposes and may not be sold, duplicated or distributed.

Scott Friedman & Associates retain the rights to all material presented during Scott's program.
